-  **Social Network Analysis in E-Learning Environments: A Preliminary Systematic Review.**  172 Citas
 - 2015 Educational Psychology Review
[Karina L. Cela](#), Miguel Ángel Sicilia, Salvador Sánchez
Escuela Politécnica Del Ejército, University Of Alcalá
Áreas de conocimiento
Compute science   World Wide Web Knowledge management
 - Etiquetas
Metadata   Ontology Data science **Data science**   Semantics
 - E-Learning Occupies An Increasingly Prominent Place In Education. It Provides The Learner With A Rich Virtual Network Where He Or She Can Exchange Ideas And Information And Create Synergies Through Interactions With Other Members Of The Network, Whether Fellow Learners Or Teachers. Social Network Analysis (SNA) Has Proven Extremely Powerful At Describing And Analysing Network Behaviours In Business, Economics And Medicine, But Its Application To E-Learning Has Been Relatively Limited.
-
-  **Improving the Scalability and Replicability of Embedded**  172 Citas
 - 07/11/2019 L Samaras, MA Sicilia, E García-Barriocanal
-
-  **Designing a Human Computation Framework to Enhance Citizen-Government Interaction**  123 Citas
